GO Biological Process

-log10(Binomial p value)

GO Term	-log10(Binomial p value)
branching morphogenesis of an epithelial tube	13.39
positive regulation of p38MAPK cascade	12.33
regulation of angiogenesis	11.83
regulation of endothelial cell migration	11.34
regulation of striated muscle cell differentiation	11.15
regulation of p38MAPK cascade	10.51
regulation of cartilage development	10.38
positive regulation of angiogenesis	9.64
branching involved in blood vessel morphogenesis	9.54
positive regulation of epithelial cell migration	9.45
chondrocyte differentiation	9.42
negative regulation of chondrocyte differentiation	9.27
odontogenesis of dentin-containing tooth	8.91
integrin-mediated signaling pathway	8.88
pathway-restricted SMAD protein phosphorylation	8.64
regulation of smooth muscle cell proliferation	8.43
cellular response to lipoprotein particle stimulus	8.33
regulation of pathway-restricted SMAD protein phosphorylation	8.30
regulation of chondrocyte differentiation	8.13
regulation of odontogenesis	8.06
